**OrecX integrates with BroadSoft® BroadWorks and Call Recording Interfaces to enable hosted call center grade recording for VoIP services companies.**

**CHICAGO, Illinois** – OrecX, the premier IP-enabled voice recording company, today announced support for Broadsofts' BroadWorks and Call Recording interfaces to enable hosted call center grade recording for all users of their VoIP switch software.

OrecX is the developer of Oreka TR , an open source call recording system that delivers easy-to-install, maintain and use voice recording tools for compliance, performance and risk applications. With Oreka TR, companies can deliver call center grade call recording solutions at a fraction of the cost, time and energy of traditional proprietary voice recording systems.

BroadSoft® is the market leader of VoIP application software that enables the delivery of hosted telephony and multimedia services. BroadSoft's family of carrier-class products, including its award-winning flagship BroadWorks® technology, deliver the scale, open architecture and reliability that the world's leading telecommunications companies demand to serve mission-critical enterprise and residential broadband customers.

The integration between OrecX's call recording software, Oreka TR, and BroadWorks® and Call Recording interfaces simplifies the deployment and costs associated with an enterprise-wide recording solution offering. Further, the integration allows VoIP services companies to differentiate themselves from competitive offerings while increasing their ARPU.

“We are pleased with the integration to the BroadWorks® and Call Recording Interfaces. The integration effort will benefit BroadSoft® customers, as well as, the world-wide open source user community, “stated Bruce Kaskey, Co-Founder and COO of OrecX

**About OrecX**

Chicago based OrecX ([www.orecx.com](http://www.orecx.com)) provides commercial open source call center grade recording solutions at a fraction of the cost of proprietary recording applications. Recognized as an industry innovator, OrecX has received accolades from Linux World, Unified Communications and VON Magazine, to name a few. Additionally, OrecX is the primary developer and sponsor of Oreka, the open source call recording project hosted on sourceforge.net ([www.oreka.org](http://www.oreka.org)). With more than 45,000 instances of downloads, Oreka GPL is the world leader in open source call recording software.
